WORK EXPERIENCE

Software Engineering Intern

Sep 2025 — Feb 2026

Ericsson

North Ryde, NSW

- Migrated the local development environment from Docker Compose to Tilt and Kind, mirroring production Kubernetes deployments and enabling hot reload for faster feedback.
- Migrated map-tile and database-backed site-information endpoints from Django to FastAPI, improving application load times and responsiveness for end users.
- Tested and improved WSL and Windows setup documentation, making development environment onboarding clearer for new developers.

Tech Mate

Apr 2025 — Sep 2025

Digital Literacy Foundation

Penrith City Library

- Delivered one-on-one digital literacy training tailored to learners with varied technical experience, helping community members independently use essential digital services.

EDUCATION

University of Technology Sydney

Sydney, NSW

Bachelor of Engineering (Honours), Software Major

Feb 2023 — Oct 2027

- Relevant Coursework: Network Fundamentals, Cloud Computing and Software as a Service, Introduction to Data Analytics

PROJECTS

Maintainer, Aurora Workstation (getaurora.dev)

Nov 2024 — Dec 2025

- Maintained a custom Fedora Linux container image used by over 2,000 people alongside three international contributors.
- Fixed kernel and application regressions by implementing package pinning, improving stability for all users.
- Developed a centralized configuration repository, eliminating duplicate code and streamlining update management.
- Automated testing and CI/CD with GitHub Actions, minimizing manual intervention and accelerating stable releases.

EXTRACURRICULAR ACTIVITIES

UTS Programming Society Secretary

Nov 2022 — Present

- Increased event attendance by 50% through strategic promotions, engaging workshops, and stronger online community participation.
- Created workshop documentation used by over 100 students and delivered Docker and GitHub workshops with containerized hands-on development environments.

UTS X Apple iOS Apple Intelligence Hackathon (Winner)

Jun 2024

- Won the one-day sprint by shipping a Swift prototype that used OpenAI Whisper for transcription and Groq-hosted Llama 3 for real-time action-item summaries.
- Designed an Apple Human Interface Guidelines (HIG)-compliant mockup in Figma, showcasing a polished, user-friendly UI.

Ericsson ML & UX Hackathon (Runner-up)

Jul 2023 — Aug 2023

- Analyzed a large 5G home internet usage dataset using Python, Pandas, Excel, and Power BI for data cleaning, trend analysis, and visualization.
- Built predictive models to forecast network demand growth and identify key trends and growth areas.

SKILLS

- **Languages:** Python, C/C++, JavaScript, Bash, Swift, HTML/CSS
- **Frameworks & Data:** React, FastAPI, Django, Astro, Pandas, PostgreSQL, Power BI
- **Infrastructure:** Docker, Kubernetes, Tilt, AWS, GitHub Actions, CI/CD, NGINX, Caddy
